

Mission statement

Konopnicka 1st High
School in Suwalki

Mission statement

The mission and the philosophy of the school are based on the hierarchy of values approved by the School Teaching Council, Parent Board and Student Council, assuming that the student is the subject, a free person, who has consciously found himself or herself in the community and is actively collaborating in forming it.

The school supports its students in their intellectual, physical and moral development. Its aim is to create possibilities for the development of the young person, based on building the best and most universal values: truth, good, justice, tolerance and openness to the world. A vital objective is to strive after the climate of peace, solid work and kindness to oneself and others.

Integrity and wisdom are to become reality which one wants for oneself and appreciates in others. Dialogue and tolerance constitute the base in solving difficult problems.
